Characterized by a health crisis, an economic crisis, a racial justice crisis, and a climate crisis, 2020 demonstrated that we cannot settle for the status quo. We must all come together to rebuild a more sustainable future. We are committed to bringing the full power of Salesforce to build a better future that works for everyone.

As hard as the past year has been, I remain as optimistic as ever about our ability to build a better world — because we’re building it in partnership with you.

Marc Benioff
Chair & CEO, Salesforce

At Salesforce, we strive to embody stakeholder capitalism – a commitment to serve all stakeholders, including our shareholders, customers, employees, partners, communities, the planet, and society as a whole. We believe that the business of business is improving the state of the world. It starts with trust, our number one value. And the key to trust is transparency.

For stakeholder capitalism to be successful, companies must transparently manage and disclose environmental, social, and governance (ESG) topics. That’s why each year we produce this comprehensive Stakeholder Impact Report so that our key stakeholders can stay informed and track our progress.
The Year in Review

An unprecedented year of interrelated crises

COVID-19 illuminated how interconnected our planet is and laid bare many of the structural challenges we still have to address. Salesforce recognizes our urgent responsibility to support our communities and our workplaces to ensure we create a more equitable and just society. For example, in FY21 we:

- **Sourced over 50 million units of PPE** for first responders and donated $30 million to support relief efforts.
- **Developed innovations** like Work.com and Vaccine Cloud to help return to work safely.
- **Donated over $7 million** to support small businesses facing hardship due to COVID-19.
- **Established the Racial Equality and Justice Task Force** and committed $200 million in donations to organizations advancing racial equality and justice.

FY21 Report Highlights

- **ESG FY21**
  - Continued to earn the trust of our stakeholders by transparently disclosing our policies and metrics
- **$120M+ TO DATE**
  - Invested to date to support education worldwide
- **10M TREES**
  - Contributed in FY21 towards our goal to conserve, restore, and grow 100 million trees by 2030
- **350+ PARTNERS**
  - Launched the Salesforce Talent Alliance to grow and diversify our ecosystem
- **$100M COMMITMENT**
  - To spend with Black-owned businesses by 2023 (FY24)
- **$1.5B IN FY21**
  - In donated and discounted technology, grants, and volunteerism in FY21 to the global community

Every year, we produce a comprehensive Stakeholder Impact Report so that our stakeholders can stay informed and track our progress on key topics. We are guided by our core values of trust, customer success, innovation, and equality, and we strive to provide transparent and inclusive environmental, social, and governance (ESG) disclosures for our stakeholders. Our ESG Steering Committee oversees our overall ESG reporting strategy, and works closely with an ESG Advisory Council consisting of leaders throughout the company. Our Board of Directors provides oversight over ESG issues overall at Salesforce.

The contents of this report are informed by an ESG materiality assessment, which identified key topics that are most important to our stakeholders and our success as a business. The materiality assessment process included an evaluation of top business drivers and sustainability impact areas as well as industry benchmarking. Interviews with key stakeholders, including shareholders, helped prioritize and validate topics. While conducting a materiality assessment helped us identify some relevant topics included in this report, it does not influence the extent of our action or programs related to a particular topic.

This report is reviewed by our Legal and SEC Reporting teams to ensure it is consistent with our other SEC filings and that data contained in the report can be traced back to internal or external records. The SEC Reporting team reviews this report using the same procedures as they do with our 1934 Securities Exchange Act filings.

This report also contains figures that have been approximated or rounded. Certain reclassifications of data from previous public disclosures may have been made to conform to the current period presentation. All currency is in U.S. dollars.

We incorporate the Sustainable Development Goals (SDGs) into our existing reporting processes to demonstrate our active participation as a business in advancing these goals. Transparency underlies Target 12.6 of the SDGs, to encourage companies to adopt sustainable practices and integrate sustainability information into their reporting cycle. Through reporting we can better understand, communicate, and manage our contribution to the SDGs.
**Third-Party Verification**

Beginning in FY18, we engaged Ernst & Young LLP (EY), an independent third party, to review our greenhouse gas (GHG) emissions data, carbon-neutral cloud metric, and adjusted net-zero operations metric. In FY21 we expanded the scope of EY’s review to include selected diversity and inclusion metrics, as well as our annual social value metric, which represents the aggregated monetary contributions of our donated or discounted products, grants, and donations to qualifying nonprofit organizations and higher education institutions. We will continue to identify and explore opportunities for expanded third-party review and we encourage others to do the same.

**Aligning to the TCFD**

We strive to integrate our sustainability efforts into our governance, decision-making processes, and business operations, and to transparently disclose our progress. In FY18, we signed a letter supporting the recommendations of the TCFD and have since worked to align to its recommendations through the maturation of our governance, risk management, strategies, metrics and targets, and external disclosure.

**ESG Metrics & Indicators**

We enhance the trust of our stakeholders by transparently disclosing our ESG policies and metrics.

**Our voluntary reporting is informed by the following frameworks:**

- The [Sustainability Accounting Standards Board](https://www.sasb.org/) Sustainability Accounting Standard for the Technology and Communications Sector, Software & IT Services industry (Version 2018-10)
- The [Financial Stability Board Task Force on Climate-related Financial Disclosures](https://www.fsb.gov/) (TCFD)
- The [Global Reporting Initiative](https://www.globalreporting.org/) (GRI) Standards
- The Ten Principles of the [United Nations Global Compact](https://www.unglobalcompact.org/) (UNGC)

Salesforce supports the continued convergence of ESG standards, frameworks, and principles to promote increased corporate transparency and comparability.

1. Salesforce began collecting self-reported gender and ethnic diversity data from our Board of Directors beginning in FY20.
2. Director tenure is measured by completed years of service from the initial month of service through the filing of the Company's annual Proxy Statement. The director tenure reported in prior fiscal years has been updated based on this methodology.

<sup>1</sup> Reviewed by Ernst & Young LLP

1. The contents of this section are informed by the recommendations of the Task Force on Financial-related Climate Disclosures (TCFD).
2. Our 100 percent renewable target is related to the procurement of electricity from renewable energy resources equivalent to 100 percent of what we used globally. Our energy consumption is larger in scope and includes purchases of electricity, natural gas, diesel, steam, fuel oil, and jet fuel.
3. Refer to Appendix A of the Independent Accountants’ Review Report for our definition of “net-zero operations GHG emissions.”

<td>-1.50%</td>
<td>3.20%</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. The following targets were set and approved by the Science Based Targets Initiative in FY20, therefore progress is reported beginning FY20.
2. Reduction is calculated using a market-based methodology with FY19 emissions as a baseline.
3. We are reporting on location-based fuel and energy related activities (FERA) for FY20 and FY21 target reporting. As is standard practice, renewable energy purchases were excluded from the calculation. In the future, we may change our approach to reflect market-based emissions to track progress against our target, similar to our Scope 1+2 Emissions target.

1. Supplier-related Scope 3 emissions are estimated using an Environmentally-Extended Input-Output (EEIO) method. We continually refine our greenhouse gas accounting processes. When new or better-quality data becomes available, we update our methodology accordingly, which may result in different results in the future.
2. This includes suppliers and their subsidiaries that have set or are committed to setting science-based targets (SBTs) via the Science Based Targets Initiative (SBTi). This also covers suppliers who have set self-declared SBTs which have not been verified by SBTi. Supplier SBTs are included if they are set or they have committed to set targets before the end of Salesforce’s fiscal year. We include suppliers that have set a target in line with a 1.5°C or a well below 2°C ambition level.
3. FY20 values have been adjusted from prior-year reporting based on improved methodologies.
4. This goal was established in FY20. Therefore, progress is reported beginning in FY21.
5. Self-reported water withdrawal data from our site operators has improved, resulting in fewer sites requiring estimated data using a regional average.
6. Water withdrawal has declined due to increased water efficiency, including water-free cooling, across our portfolio.
7. Office facilities water withdrawal intensity factors were not adjusted for reduced occupancy due to COVID-19. Intensity factors are used for sites at which Salesforce does not have access to actual data and must impute emissions.
8. FY20 was the first year we reported water withdrawal disaggregated by baseline water stress. Therefore, we do not report this disaggregation for FY19.

^1 Excludes spaces acquired through mergers & acquisitions, which over time, whether through retrofits or reallocation we expect to bring up to our sustainable built environment design standard.

^2 For a detailed inventory of categories included in our carbon neutral cloud calculation, please refer to Ernst and Young LLP’s Independent Accountants’ Review Report.

^3 Office facility intensity factors have been adjusted for reduced occupancy due to COVID-19 impacts based on fiscal year 2021 actual data. Intensity factors are used for sites at which Salesforce does not have access to actual data and must impute emissions.

---

1. Includes Scope 1 emissions from company aircraft.
2. Includes Scope 1 emissions from company shuttle.
3. Excluded Scope 3 activities are not relevant to Salesforce.
4. Emissions are estimated using an Environmentally-Extended Input-Output (EEIO) method based on Salesforce’s annual spend (USD) in this category.
5. Calculated using a location-based methodology.
6. Salesforce relies on its travel vendor partners to provide us with all data on modes of travel taken by our employees to incorporate its corresponding carbon into our overall carbon footprint. Raw travel data is calculated against emissions factors that correspond with each travel type.
7. FY21 values are imputed based on FY20 survey results and only account for first 2 months of the fiscal year when employees actually commuted to an office.
8. Salesforce calculates the greenhouse gas emissions generated from all customers’ use of our products on their end devices, based on customers’ using time on the products and power use of their end devices.

1. FY21 is our first year calculating this number, based on self-reported employee survey data. This metric is a location-based number based on employee location, and excludes any renewable energy or carbon offsets that our employees procured.
2. Our 100 percent renewable target is related to the procurement of electricity from renewable energy resources equivalent to 100 percent of what we used globally. Our energy consumption is larger in scope and includes purchases of electricity, natural gas, diesel, steam, fuel oil, and jet fuel.
3. Calculated using a market-based methodology.

---

1. Locations included in data table represent over 90% of Salesforce’s Scope 1 & 2 location-based emissions.
2. Market-based emissions are reduced using renewable energy credits (RECs) or equivalents generated by renewable energy projects procured through virtual power purchase agreements or data center vendor’s renewable energy procurement or a combination of both.
3. Market-based emissions are higher due to calculation using emission factor for the residual grid mix.

<td>With a highly-distributed global workforce, we are able to deliver the highest levels of performance, availability, and security. Leveraging our own technology and other tools, we can coordinate, collaborate, and create effectively across borders. We recognize the diversity in our global workforce, and ensure we create a strong corporate culture based on our core values: Trust, Customer Success, Innovation, and Equality. We operationalize these values through specific measurable actions around accountability, alignment, transparency, integrity, and experience. Our employee code of conduct, goal planning process, employee surveys, town halls, workforce analytics initiatives, and more allow us to manage and measure our culture and workforce, at scale, while developing local talent pools and reducing risks related to visa controls, relocations, and other business factors that we would face with a workforce tied to a single country or region. Our government affairs teams are also engaged at the local, state, and country levels to lobby for policies that are aligned to our values and business continuity. None of our employees in the United States are represented by a labor union. However, employees of certain foreign subsidiaries are represented by works councils.</td>

We offer our employees various talent development programs to create a culture of continuous learning. Learning and development opportunities include Trailhead, our learning platform available for all employees, in-person and virtual classes, guides and workbooks, and more. We also encourage our employees to seek personal and professional development opportunities with external organizations and offer a yearly education reimbursement to employees who wish to continue job-related education from accredited institutions or organizations. For example, over 6,000 employees participated in at least one of our professional development training programs in fiscal 2021.

</thead>
</table>

| Description of organizational alignment strategy          |      |      |      |           |

Organizational alignment and consistent and clear communication are a key part of our employee engagement, especially as our company continues to grow. When Salesforce was founded, we developed an internal management tool used by all employees on an annual basis called the V2MOM (Vision, Values, Methods, Obstacles, and Measures). Each year we complete a corporate V2MOM and then all employees are expected to complete their own V2MOM that aligns with the corporate V2MOM. In addition, by using the Salesforce Platform, every individual employee V2MOM is available and searchable for the entire company.

1. URG is defined to include gender, ethnic, and other groups that are historically underrepresented within the U.S. technology industry. As such, women have been included as a URG and Asian and Indian ethnicities are not considered underrepresented.
2. All URG designations are based on self-reported information. Employees who did not self-disclose as one of the URGs were assumed to be unaffiliated with any URG.
3. Progress against the target is calculated based on employee headcount data as of November 2, 2020. Employees include both full time and part time employees.
4. Progress against the target is calculated by dividing the number of employees identified under one of the URGs by the total number of US employees.
5. This goal was established in FY20, therefore FY20 is the first year we are reporting our progress towards this goal.
6. This goal was established in FY21, we expect to report progress in FY22.

### IMPACT INVESTING

Impact investing | Impact Fund Homepage | 
Strategy for impact investing | The Salesforce Ventures Impact Fund invests in the growth of cloud companies addressing some of today’s most pressing needs, including access to education and reskilling, climate action, and diversity, equity, and inclusion. We invest in diverse founders that understand the needs of their communities and to increase access to capital for traditionally underserved founders.
Capital committed to date (millions)\(^2\) | $150 | 
Number of portfolio companies | 28 | 

---

1. To conduct the assessment, we group employees in comparable roles and analyze compensation of those groups to determine whether there are unexplained differences in pay. The global assessment considers differences in pay by gender. In the U.S., the assessment also considered differences in pay by race and ethnicity.
2. Committed represents total capital committed by Salesforce Ventures to the Salesforce Ventures Impact fund which is expected to be deployed over time. It does not represent investments in portfolio companies to date.
### Supporting Our Communities

- Reviewed by Ernst & Young LLP for FY21 and FY20

1. Our work as a founding member of Pledge 1% is foundational to our corporate culture and has resulted in a meaningful positive impact on our communities. This program has been ongoing for over 20 years. Beginning in FY20, we have developed a criteria to quantify the aggregated monetary value of our social contributions.
2. Donated or discounted products offered to qualified non-profit entities, higher education institutions or other non-governmental organizations (collectively referred to as “non-profits”).
3. Grants and donations provided directly to non-profit entities by Salesforce, Salesforce matching of employee contributions to non-profit entities, and grants to improve local communities by the Salesforce Foundation.
4. Time volunteered by Salesforce employees for pro bono professional services (i.e. a product developer supporting a non-profit with their technology needs).
5. Value is based on self-reported volunteer hours by employees. We will continue to refine our process for tracking and reporting on volunteer hours which may cause different results in the future.
6. Time volunteered by Salesforce employees to support community initiatives that they care about (i.e. a sales representative volunteering to serve meals at a homeless shelter).
7. Metrics are lifetime to date as of the fiscal year end.
8. Target for philanthropic investment in racial equality & justice efforts (millions)
9. Target for spend with Black-owned businesses (millions)
10. Spend with Black-owned businesses is defined as total spend on U.S. businesses that have certified or classified (self-identified) that the business is at least 51% owned by an individual or group who self identify as Black or African American. A third-party data enrichment provider reviews and verifies the certification or classification of each business.
This report contains forward-looking statements, the achievement or success of which involves risks, uncertainties, and assumptions. If any such risks or uncertainties materialize or if any of the assumptions proves incorrect, the results of salesforce.com, inc. could differ materially from the results expressed or implied by the forward-looking statements we make.

The risks and uncertainties include – but are not limited to – risks associated with the impact of, and actions we may take in response to, the COVID-19 pandemic, related public health measures and resulting economic downturn and market volatility; our ability to maintain security levels and service performance meeting the expectations of our customers, and the resources and costs required to avoid unanticipated downtime and prevent, detect and remediate performance degradation and security breaches; the expenses associated with our data centers and third-party infrastructure providers; our ability to secure additional data center capacity; our reliance on third-party hardware, software and platform providers; the effect of evolving domestic and foreign government regulations, including those related to the provision of services on the Internet, those related to accessing the Internet, and those addressing data privacy, cross-border data transfers and import and export controls; current and potential litigation involving us or our industry, including litigation involving acquired entities such as Tableau, and the resolution or settlement thereof; regulatory developments and regulatory investigations involving us or affecting our industry; our ability to successfully introduce new services and product features, including any efforts to expand our services; the success of our strategy of acquiring or making investments in complementary businesses, joint ventures, services, technologies and intellectual property rights; our ability to complete, on a timely basis or at all, announced transactions, including our proposed acquisition of Slack Technologies, Inc.; our ability to realize the benefits from acquisitions, strategic partnerships, joint ventures and investments; our ability to successfully integrate acquired businesses and technologies; our ability to compete in the market in which we participate; the success of our business strategy and our plan to build our business, including our strategy to be a leading provider of enterprise cloud computing applications and platforms; our ability to execute our business plans; our ability to continue to grow unearned revenue and remaining performance obligation; the pace of change and innovation in enterprise cloud computing services; the seasonal nature of our sales cycles; our ability to limit customer attrition and costs related to those efforts; the success of our international expansion strategy; the demands on our personnel and infrastructure resulting from significant growth in our customer base and operations, including as a result of acquisitions; our ability to preserve our workplace culture, including as a result of our decisions regarding our current and future office environments or work from-home policies; our dependency on the development and maintenance of the infrastructure of the Internet; our real estate and office facilities strategy and related costs and uncertainties; fluctuations in, and our

ability to predict, our operating results and cash flows; the variability in our results arising from the accounting for term license revenue products; the performance and fair value of our investments in complementary businesses through our strategic investment portfolio; the impact of future gains or losses from our strategic investment portfolio including gains or losses from overall market conditions that may affect the publicly traded companies within our strategic investment portfolio; our ability to protect our intellectual property rights; our ability to develop our brands; the impact of foreign currency exchange rate and interest rate fluctuations on our results; the valuation of our deferred tax assets and the release of related valuation allowances; the potential availability of additional tax assets in the future; the impact of new accounting pronouncements and tax laws; uncertainties affecting our ability to estimate our tax rate; uncertainties regarding our tax obligations in connection with potential jurisdictional transfers of intellectual property, including the tax rate, the timing of the transfer and the value of such transferred intellectual property; uncertainties regarding the effect of general economic and market conditions; the impact of geopolitical events; uncertainties regarding the impact of expensing stock options and other equity awards; the sufficiency of our capital resources; risks related to the availability and funding of our bridge loan facility and term loan associated with our proposed acquisition of Slack Technologies, Inc. and other indebtedness; our ability to comply with our debt covenants and lease obligations; and the impact of climate change, natural disasters and actual or threatened public health emergencies, including the ongoing COVID-19 pandemic.

Further information on these and other factors that could affect the company's financial results is included in the reports on Forms 10-K, 10-Q and 8-K and in other filings we make with the Securities and Exchange Commission from time to time. These documents are available on the SEC Filings section of the Investor Information section of the company’s website at www.salesforce.com/investor.

Salesforce.com, inc. assumes no obligation and does not intend to update these forward-looking statements, except as required by law.
